

Idaho News From Her Main Cities and Towns.

SUNDAY CLOSING IS KNOCKED OUT

Mayor Pinney's Veto to the Ordinance Was Sustained by the Boise City Council by a Majority of One Vote—State Fair Opens on Monday—Contract for Steel Cells Let Six Years After Building Is Erected.

Special Correspondence.
BOISE, Ida., Sept. 22.—Today Mayor Pinney's veto to the Sunday closing ordinance was sustained by the city council by a majority of one. This means that on Sunday the habitual patron will be enabled to wander down town in search of his early morning bracer as of yore.

Prior to this action there was considerable activity manifested on the part of Boise's citizens, quite to the surprise of the Sunday and midnight closing question once more.

Mayor Pinney manifested a disposition to raise another level and to repeal the present closing ordinance, but some members of the council favored still more stringent measures, protesting the sale of articles shown, such as the demand of hundreds of peace-loving residents of this city, manifested in several numerous signed petitions now in the hands of the council, the members of that body determined to make final disposition of the question by re-enacting the present ordinance and attaching thereto more stringent measures, bringing under control all the wholesale liquor houses and restaurants, and placing the hour of opening at 6 o'clock instead of 6 o'clock.

The mayor has vetoed this new ordinance, which was passed recently by the council with a vote of 9 to 3. Another meeting of the council will be held Tuesday morning at 10 o'clock, at which time the ordinance will be reconsidered.

Monday morning will witness the opening of the big state fair in this city, which event promises to be one of unusual interest. Everything is being put in "apple pie" order for the occasion.

Thursday, the 25th, is Derby day, and according to present indications, it will be the greatest one Boise has ever seen.

Besides our local and Interstate races, six carloads of horses have arrived from Portland, two carloads from Butte and one car from Salt Lake.

SALE OF LAND.

Chief Clerk Charles McConnell of the state land board announces that on Tuesday morning at 10 o'clock, at which time the land will be sold at public auction at the capitol building, 6,000 acres of land at from \$10 to \$40 an acre. This land is lying under the Boise-Payette canal, along the Fayette river.

The terms of the sale will be 10 per cent down and the balance in 18 months.

BLACKFOOT FAIR A GREAT SUCCESS.

Special Correspondence.
BLACKFOOT, Ida., Sept. 22.—This week the Southeastern Idaho fair is in full swing, and it bids fair to be the most successful one ever held here.

The opening day's attendance far exceeded those of other years, and the hearts of the management can hardly be other than pleased over the large receipts and also the interest shown by the people.

The educational exhibits were about one-half as large as the whole state of Idaho had at St. Louis last year. There are all kinds of articles shown, such as maps with raised surface, drawings, story pictures, botanical displays, etc.

The fruits, apples, dairy, farm and garden products, household fine arts, embroidery and burnt wood, floral and children's art displays are far ahead of those of any previous season, in every way.

The stock exhibit is simply without parallel in this part of the state.

There is one wonder where they all come from. One wonders where they all come from.

ELKS INVADERS CITY.

Yesterday the boys of the B. P. O. E. held forth in royal splendor, and as usual had a glorious old time. About 100 of them came on special train from Pocatello and Idaho Falls. County Attorney Parley P. Christensen of Salt Lake was notified in the crowd. The mayor of Blackfoot assured them that the keys of the city had been thrown in the well at 7 a. m., and would not be

WEEKLY BUDGET FROM OAKLEY.

Special Correspondence.
OAKLEY, Ida., Sept. 21.—Cassia state Sunday school convention was held in the academy building Sunday. Elder George Heyington, of the general superintendency, and Elder James E. of the Deseret Sunday school union board were present, and contributed largely to the success of the convention. Many important subjects were considered bearing on Sunday school work.

At the closing meeting of the convention Supt. S. P. Worthington, who had tendered his resignation, on account of having been appointed to a mission in Chicago, was released, and a new state board was sustained as follows: Gibson A. Condit, superintendent; George H. Severo, first assistant superintendent; R. L. Mills, second assistant superintendent; Newell Dayley, secretary and treasurer; Viola Bates, chorister; Lyman Smith, organist, with the following members of the board: Jos. V. Haight, James H. Worthington, Geo. E. Cranger, Olive Wilson, Lucy Reed and Lulu Bates.

The convention was a profitable one and will add materially to the growth of the Sunday school work in this district.

During the past few weeks four new Sunday schools have been started at the "Mormon" Church have been started along the Snake river, under the two great irrigation schemes. The last of these schools was organized at the prosperous town of Heyburn, on the north side of the river, opposite Burley, with Elder George E. Hielewell as presiding Elder and superintendent of Sunday school, and Joel E. Strine, assistant superintendent. The Saints at Burley have commenced the erection of the new meetinghouse, Messrs. Cave & Co. of Burley, contractors and builders, have also contracts to erect new church buildings at Oakley, Third ward and Albion.

Through the courtesy of the passen-

ual installments, where the purchase price per acre is \$25 or less. Where the price per acre exceeds \$25, two-thirds cash is required, the remainder to be paid in 16 annual installments.

SIX YEARS AFTER.

The board of prison commissioners today let a contract for putting in the steel work in the cell house at the penitentiary. The walls of that structure were erected six years ago, and it has remained in that condition. The contract for the steel was secured by the Whitehead & Kalla Iron Works of the east, the price being \$2,000. Other bids ranged as high as \$14,000. The building is badly needed, all the cells of the other two being crowded.

GOVERNOR ON TAX LEVY.

Governor Gooding in an interview here yesterday stated that if the constitution is amended so that the state tax levy and refusing to provide for that portion claimed to be in excess of the constitutional limitation succeeded in the pending suits, the state board would be obliged to close some of the state institutions of learning when the money is exhausted.

Among other things he is quoted as saying:

"Of course if the counties should be upheld in their contention it would result in closing the doors of several of our institutions of higher education. As a usual thing most of these institutions have in the past shown a deficit at the end of the two years' term, payment of which has to be provided for by the succeeding legislature. In fact the last legislature provided for the payment of \$45,000 on deficiency claims of various kinds from the previous year."

"This materially added to the total of the general appropriation bill. The levy for the payment of the deficiency claims and for the payment of the debts of the various counties for unpaid taxes due the state would more than make the excess that is complained of by the protesting counties. The state board of examiners would be compelled to presume that this year's refusal to levy and collect money for these deficiencies would be repeated next year, and the board would not be justified in authorizing the issuance of deficiency certificates."

PLAN PROPOSED.

The plan now proposed by the city council is to install a pumping plant on the bank of the Payette river near the wagon bridge south of town and to build a reservoir on the hill southeast of town, thus giving the city gravity pressure and in cases where the quantity of water is needed direct pressure can be applied. The reservoir will

be made of cement will be 100x50 feet, divided into two sections, each independent of the other. It is estimated the pressure will be about 80 pounds. To carry out these plans it will require \$10,000 more than the council now has on hand and after being presented with these facts the meeting adopted strong resolutions expressing confidence in the present city council's plan to complete the water works and recommending that all citizens vote for the bond issue.

RAILROAD UP THE VALLEY.

A meeting was held last Friday at New Plymouth, when the people there were given assurance that there was capital ready to build a steam railroad up the Payette valley if the people would give the right of way. The proposed line would connect with the Oregon Short Line on this side of the Snake river bridge about two miles from Payette, and would pass up the valley through Pleasant View, where a station would be located, and terminate at New Plymouth. According to reports at this place the proposed line is to be completed in time for the best grovers in the Payette valley to use it in transporting their crop to the sugar power plant at New Plymouth. Although it has not been divulged who is to furnish the capital for the road, it is the supposition that the Oregon Short Line is interested in the project, and that the road will be built here during the next year are back of the project.

MASTODON FOUND ON SNAKE RIVER.

Huge Skeleton, Three Times The Size of an Elephant, Unearthed on the Banks of River by a Placer Miner Named Hunt.

Special Correspondence.
NIDEELEY, IDAHO, Sept. 21.—The banks of the Snake River were once the haunts of immense animals that must have been mastodons. The writer has seen immense bones belonging to the ancient animals and some time ago a man by the name of Hunt was stripping land for placer mining and was disappointed in not finding the gold-bearing gravel. He, however, uncovered the complete skeleton of a mastodon. A man who saw it said that it had immense ivory tusks and horns shaped like a cow's, but eight feet in length. The hair was still on part of the animal and was about six inches long, black and curly. From the size of the bones it was estimated that the animal was, perhaps, three times the size of an elephant.

Miss Grace Reed has gone to Logan, Utah, to attend the R. Y. academy. George Morris and his brother, Parley Morris went at the same time. George Morris will attend school there this winter.

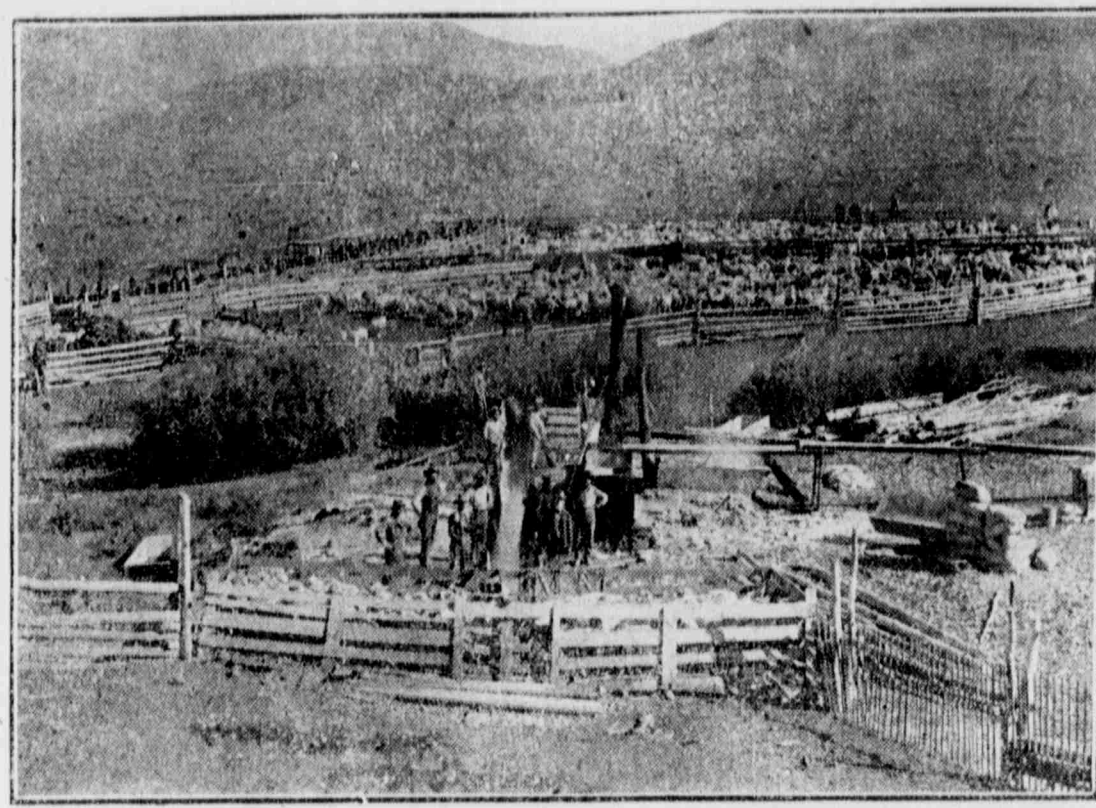

School began, at Neeley, Monday with an attendance of 25. Besides the regular work, vocal music and drawing will be taught.

Efforts are being made to raise money to build a meetinghouse. There is some money on hand but not enough. The schoolhouse, heated by a furnace, which has been used for both school and church purposes, is a great inconvenience and the people desire a change.

Malad Man Caught Under Heavy Rock

Special Correspondence.
MALAD CITY, ONIDA CO., IDA., Sept. 20.—The funeral of David Jenkins was held last week at the Josephine chapel.

The news of the horrible accident which resulted in his death was brought to his wife and friends Saturday. It appears that while seated on the platform of the depot at Bad Springs he volunteered his assistance in unloading a tombstone weighing over 400 pounds. When the stone was balanced, the engine whistled, frightening the horses, and their efforts to get away caused the marble block to fall. Unfortunately for Mr. Jenkins, it fell against a huge post, and the stone fell upon him. It severed his ear from his head and crushed the skull. He was immediately taken care of by physicians, but his life could not be saved. He lived two days, unconscious to the last. His body was brought to Malad. The deceased leaves a wife and child, besides a number of relatives, to mourn his demise. He was a good companion,

A TYPICAL IDAHO SHEEP-DIPPING SCENE.

Modern Improvements for Payette.

Citizens in Mass Meeting Assembled Discuss the Project of Installing a First-Class Water System—Money Ready to Build a Steam Railroad Up The Valley Provided the Right of Way is Donated.

Special Correspondence.
PAYETTE, Sept. 22.—A mass meeting was held this week in the Elite opera house, and while it was not largely attended it was a representative assembly. The meeting was called by Mayor Haynes for the purpose of acquainting the citizens of Payette with all that had been done in connection with the city water works, which are being installed, and ascertaining what was the sentiment in regard to the proposed bond issue which is to come up for settlement Sept. 29. The amount of bonds asked for at this time is \$10,000. Bonds to the amount of \$20,000 were issued in the beginning and according to the figures given in round numbers at the meeting last night about \$14,000 have been expended for piping the city and more than \$2,000 in boring the well on the hill east of town, which has been abandoned, leaving on hand something over \$3,000.

PLAN PROPOSED.

The deceased leaves a wife and child, besides a number of relatives, to mourn his demise. He was a good companion,

cheerful, kind and honest. He was 40 years old.

The poles for the electric light plant are being erected north of town. Those in town having been up for about two weeks, Manager McLaughlin says all will be in running order by Dec. 1. The poles are being set by the B. J. Birell, about seven miles north of Malad.

Miss Mary A. Dudley, daughter of H. W. Dudley, died of typhoid fever. Twenty-six of our young people have gone to Logan to attend school there this winter.

The hum of the threshers resounds through the valley. The farmers are exultant over the fine crops, which have been their expectation.

Mr. and Mrs. R. T. Owens and Mr. and Mrs. W. H. Jones have gone to visit the Portland fair.

BEET FACTORY BOOMS NAMPA.

Special Correspondence.
NAMPA, Ida., Sept. 22.—It is understood that B. S. Weymouth and Judge F. J. Smith of Caldwell have a 20-acre sugar beet contract in view for next year. The planting is to be done on Judge Smith's land, which has been leased by Mr. Weymouth. This contract is conditioned upon making satisfactory arrangements with other parties to this dig and the beet will be planted in the fall. The beet will be planted in the fall. The beet will be planted in the fall.

Phones and Lights For Franklin, Ida.

Special Correspondence.
FRANKLIN, ONIDA CO., Sept. 21.—Franklin is building up, with several new houses erected this season. The Bell Telephone company has a force of men here erecting poles and stringing long electric lights will also be installed. The plant is to be located on High Creek and the company proposes to commence operations before long.
